

Estadio Príncipe Faisal bin Fahd

El estadio Príncipe Faisal bin Fahd de Riad, en Arabia Saudita emplea **cuatro equipos Vulcan S100** para tratar el circuito cerrado del agua refrigeración.

Desde que se instaló Vulcan, hace 8 años, no se han vuelto a usar productos químicos

Instalado por:
Wroodsham for Trading & Contracting Est.

A worker in a yellow vest and hard hat is shown installing a large copper pipe on a ceiling. The pipe is part of a larger system, and the worker is reaching up to secure it. The background shows other pipes and ceiling structures.
